Methyl Ethyl Ketone Sales Certification

The Environmental Protection Agency has issued a test order for Methyl Ethyl Ketone (MEK) under the Federal Food, Drug and Cosmetic Act. This order is specific to MEK used in the formulation of pesticide products. Harcros has elected to opt out of this testing program by not offering MEK for use in pesticide formulations.

Please sign below to indicate that your company will comply with the following statement:

“Buyer shall not use Methyl Ethyl Ketone (MEK) in the formulation of a pesticide product, or sell or distribute MEK to any person the buyer knows or reasonably should know intends to use MEK in the formulation of a pesticide product, as of August 25, 2010.”
